

Airport transfer

Public Transportation

You can take the private airport services to go to the city center from Luxor International Airport (LXR).

Taxi

The distance between Luxor International Airport and the city center is around 6 kilometers. You can reach the city center by taxi in about 10 minutes. If you walk a little distance from the airport and take a taxi from the streets instead of the ones waiting specifically at the the airport, you can travel with more affordable prices. Do not forget to bargain with the taxi drivers as you should do anywhere in Egypt.
